RAA Charge is moving SA ahead

As an innovative and proud community-focused organisation, RAA is committed to providing sustainable, environmentally friendly, and socially responsible products and services designed to benefit members and the community.

We're passionate about South Australia and the role electric vehicles will play in the long term sustainability of our state and decarbonisation of transport. RAA was there supporting the last great transport revolution in the early 1900s and now we're leading the way again to support South Australia's transition to a low emission transport future.

Charge faster and travel further with our tailored electric vehicle charging products and services:

- **RAA Charge Public**
- **RAA Charge Fleet & Commercial**
- **RAA Charge Residential**
- **RAA Charge Managed Services**

RAA's Acknowledgement of Country artwork series was created by Elizabeth Close, a Pitjantjatjara and Yankunytjatjara woman from the APY Lands in Central Australia, now living and working in Kurna Country.

In the spirit of reconciliation RAA acknowledges the Traditional Custodians of country throughout Australia and their connections to land, sea, and community. We pay our respect to their Elders past and present and extend that respect to all Aboriginal and Torres Strait Islander peoples today.

Charging solutions for every need

As the state’s peak motoring body, we believe we have a role to play in supporting the transition to a low carbon transport system. It is RAA’s responsibility to lead the journey to electrify SA’s transport network. Through partnering with RAA Charge, local Governments and a broad range of businesses are provided with an immediate avenue to action their sustainability goals.

RAA Charge Public

With support from the State Government, RAA has built South Australia’s first state-wide EV charging network comprising of 140 charging sites and more than 500+ charging bays. Spanning highways, regional centres and shopping centres, the network will make it easier than ever to own and drive an EV in South Australia.

The RAA Charge network currently holds the leading position in the market for public charging infrastructure. With its extensive network of charging stations, it has become the go-to choice for EV owners seeking reliable and accessible charging solutions.

RAA Charge Fleet & Commercial

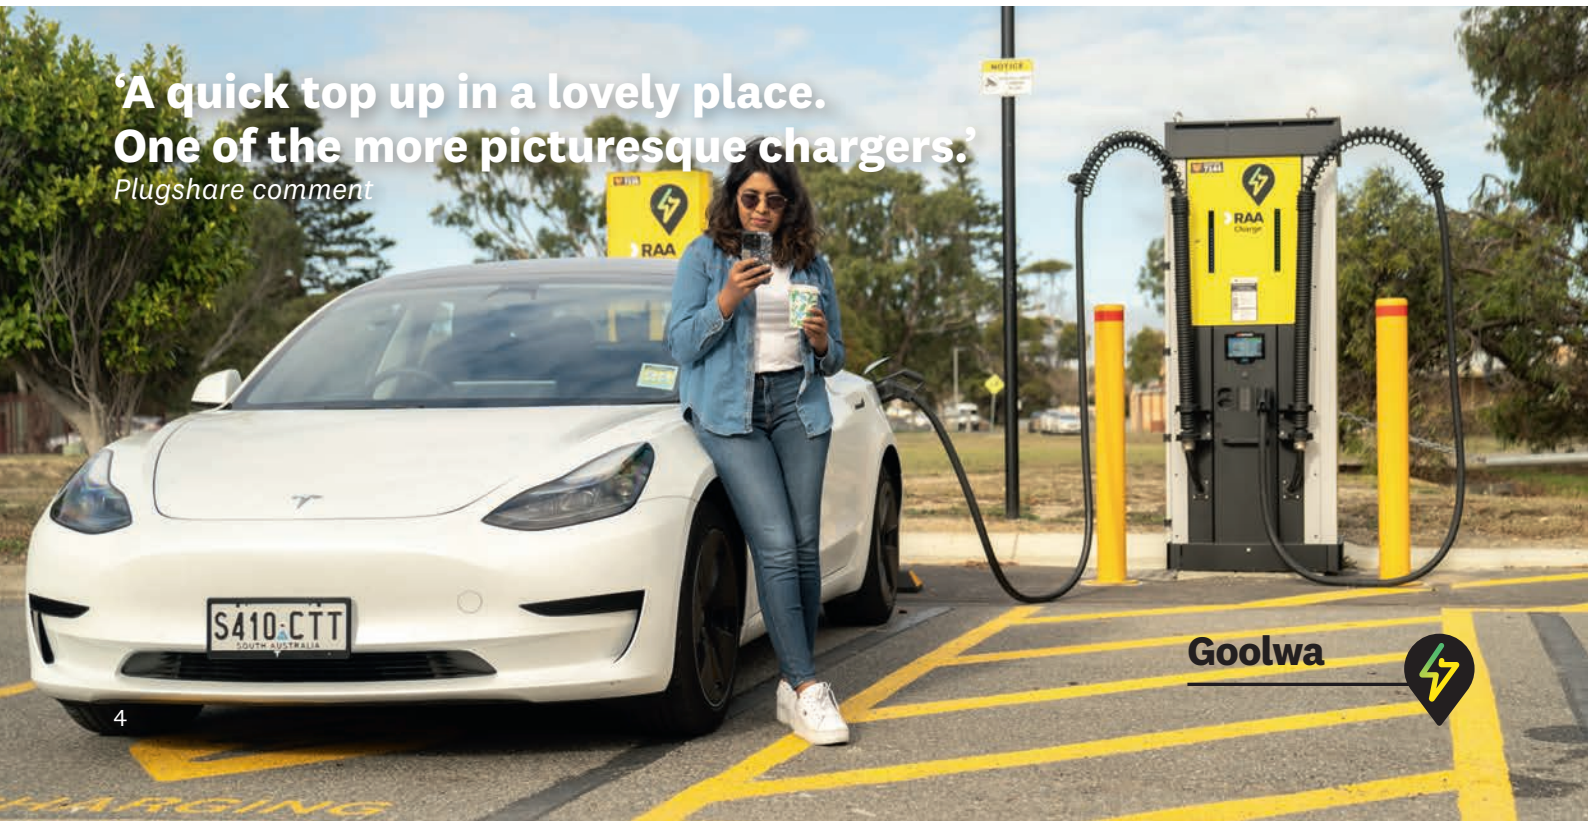

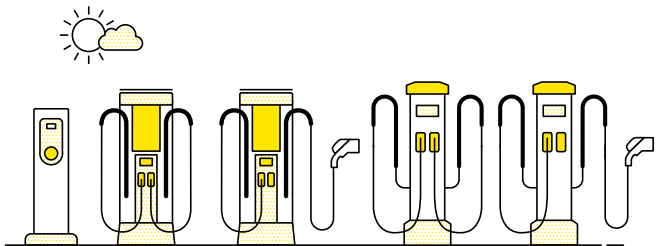

With commercial fleets transitioning to EV and Plug in Hybrid vehicles, RAA Charge can assist businesses with custom products and solutions to suit a broad range of charging needs be it; fleet charging, staff carpark, depot charging or visitor charging.

RAA Charge Residential

With approximately 80% of EV charging happening at home, and EV drivers keen to maximise solar energy for their vehicles, our team is here to assist. We guide EV owners through the purchase and installation of a home EV charger, which can charge up to three times faster than a standard power point. Our qualified electricians ensure a seamless installation process, helping you find the ideal home-charging system without any hassle.

RAA Charge Managed Services

Our Monitoring and Maintenance service is designed to keep critical EV infrastructure running smoothly and prevent potential issues. Real time and remote monitoring as well as both proactive and reactive maintenance means reduced downtime and peace of mind.

**‘A quick top up in a lovely place.
One of the more picturesque chargers.’**

Leading the charge in SA

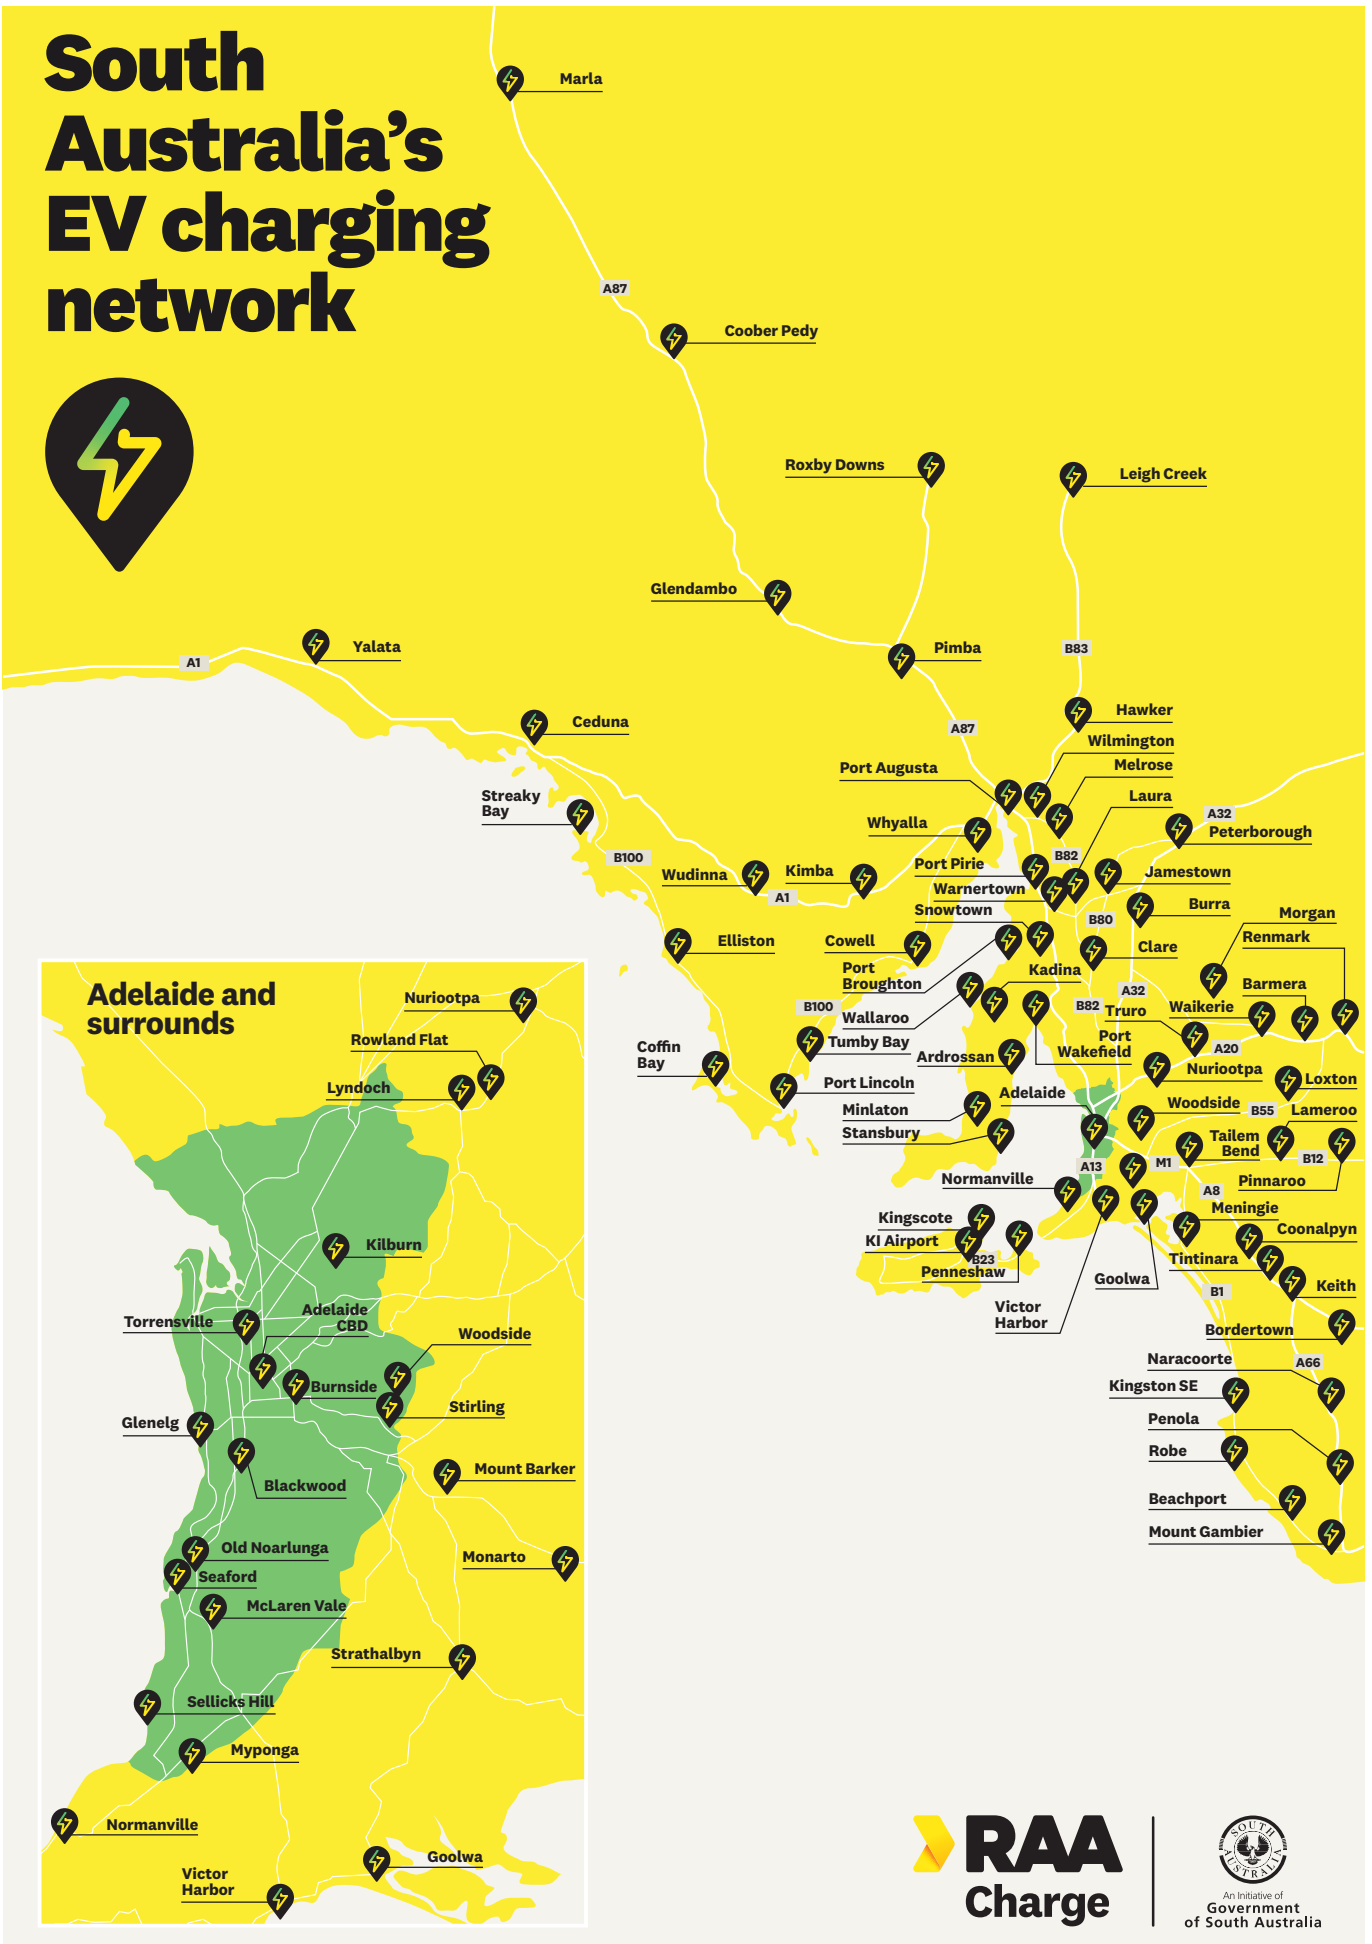

Consult. Design. Construct. Manage.

RAA offers end-to-end EV Charging solutions from feasibility to design, procurement, construction, ongoing service, maintenance and customer service.

The team has a variety of experience in liaising with a range of stakeholders including state and local government, industry stakeholders, small to large businesses, SA Power Networks, vendors and suppliers in the installation of EV charging infrastructure.

- Close relationships with industry stakeholders and top tier vendors for reliable infrastructure and software systems
- In-house technical and installation expertise
- Local Operations and a 24/7 Customer Service call centre
- > 99.5% availability across all RAA Charge owned or operated equipment

South Australia's EV charging network

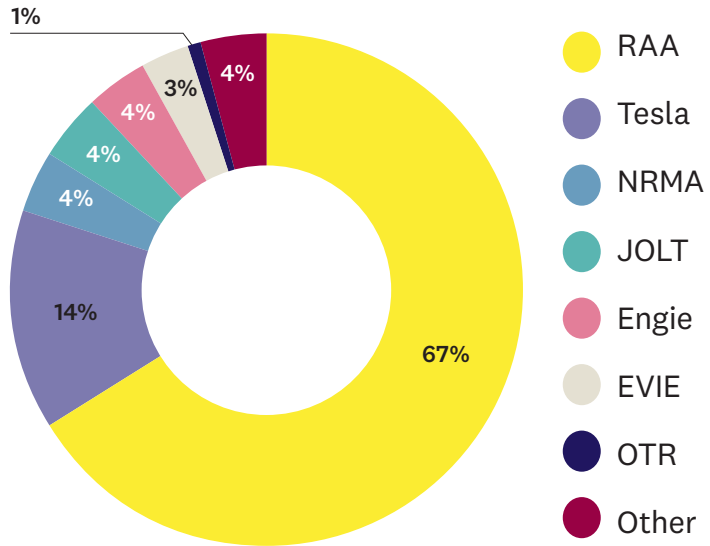

South Australian Public Charging Sites

As of August 2024, RAA Charge achieved the largest market share for public charging in South Australia.

‘Good fast charger with great access and an even better location!’

Partner & Customer Feedback

“Working with the RAA team recently to have RAA charging stations installed at the Barossa Central Shopping Centre was a pleasure. The whole RAA team worked together and with our centre seamlessly. Communication was always forthcoming, providing a timeline of work required and achieving in a timely fashion. If any issues arose, they were dealt with expediently and professionally.”

Wendy Smith, Shopping Centre Manager – Barossa Central Inside Out Retail Property

“Throughout the project’s lifecycle, the Department has maintained a productive and professional relationship with RAA. The quality of work delivered by RAA has been excellent, significantly contributing to South Australia’s sustainable future. The scope of this project is expansive, encompassing over 530+ charging points at 140+ sites.

Given their demonstrated expertise and commitment, I wholeheartedly recommend RAA Innovation Pty Ltd as a valuable partner in the delivery and operation of EV charging infrastructure.”

Brett Allen, Manager Projects, Project Implementation – Department for Energy and Mining
